

Blueball Quantum Sandvox Designs Bundle

Version Release Notes

Version 3.0 - Released 03-04-10

Includes the following updates to all 6 Quantum designs:

- Updated and adjusted main.css file extensively including css updates required for Sandvox 1.6.
- Updated info.plist file in various areas.
- Added in layered Photoshop files for users of the design to create their custom banner images with. Included 1 file for each design width. Now it is easy to replace the black gradient rectangle area with your own image to create a unique banner image for your Sandvox site pages.
- Created all new Quantum design demo sites.
- Updated all 3 Quantum design Readme files extensively.

Version 2.0 - Released 02-25-09

Includes the following updates to all 6 Quantum designs:

- Fixed display issue with IE6 when IE6 was not in full screen mode that caused page contents to be off center. Page contents now display correctly when IE6 is not in full screen mode.
- Added in several new css adjustments to the main.css file: Removed width in body div. Added in bottom margin of 10px to paragraph div. Many small adjustments made to pagelet and callout css. Changed site-menu-container div's positioning to absolute to fix menu positioning display issue when Sandvox user increased the Title and Title paragraph sizing.
- Added in new image resizing to each design's info.plist file. All images in content area, sidebar pagelets, callouts, and single image pages are now resized through the info.plist file in the design overriding Sandvox's default image rescaling.
- Added in new placeholder image.
- Updated info.plist file with new version number and new CFBundleVersion numbering.

Version 1.0 - Released 10-19-08

- GM release of Blueball Quantum design bundle
